

Supporting a Leading Security Box Brand

Background

Since its launch in 1998 Van Vault has become a highly regarded secure storage solution for tradesmen and is the UK's No.1 mobile security brand. Van Vault products are designed to deter thieves from nicking valuable tools and equipment, whether it's from a vehicle or out on a work site. Van Vault products are not display units. JC Metalworks have been commissioned to produce retail products for sale.

“Working with JC Metalworks is a pleasure. We are kept informed at all stages of production via their Project Management team and the high quality of the finished product meets our requirements each and every time.”

Tim Trollope, Van Vault Category Manager - BPT

Challenge

Van Vault products have tolerance critical folds within the product which need to be met.

Solution

JC Metalworks have the design capability, utilised its state-of-the-art machinery and different processes such as in-house screen print and assembly to develop a solid range of products for Van Vault for onward sale.

Results

The products were developed from a sample and developed in-house. JC Metalworks have been working with this client now for over 12 months and are happy to see re-orders of this product running through the business.

“JC Metalworks have consistently hit the output levels we require for this best-selling product. We are very happy to continue working with them.”

Tim Trollope, Van Vault Category Manager- BPT
